

### Why choose ICT A Level?

ICT at A Level enables you to develop invaluable transferable skills such as presentation and project management skills. In today's world, where ICT is constantly changing, technological and information literacy skills are highly prized.

### What will I study?

The course is designed to encourage learners to become discerning users of ICT. You will develop a broad range of ICT skills and knowledge and you'll explore the latest technologies, such as Bluetooth, broadband and global positioning systems.

### What career and university options can it lead to?

ICT at A Level is highly regarded by employers and universities. As a result of this, there is a growing need for individuals who can master and manipulate these new technologies. University courses that relate specifically to the skills acquired through ICT A Level include Network Engineering, Web Technology, Games Design, Artificial Intelligence and Business Information Systems.
