

Why choose Psychology A Level?

Psychology is the scientific study of mind and behaviour. If you are interested in understanding human behaviour and the way that it can be studied, Psychology might be for you.

What will I study?

You will learn how to use different perspectives to interpret the world around you and will develop analytical and evaluative skills. We study key issues and theories and learn to apply our understanding to real life examples.

What career and university options can it lead to?

Psychology is a popular degree choice and can lead to careers in most areas, but education, marketing, advertising, medicine, the law and human resources are common choices.
