

Why choose Information Technology?

This course is designed to develop professional, personal and social skills through interaction with peers, stakeholders and clients, as well as theoretical knowledge and an understanding to underpin these skills. These support the transferable skills required by universities and employers such as communication, problem solving, time management, research and analytical skills.

What will I study?

You'll develop your knowledge and understanding of the principles of IT and global information systems. You will gain an insight into the IT sector as you investigate the pace of technological change, IT infrastructure, the flow of information on a global scale and the importance of legal and security considerations.

What career and university options can it lead to?

The course is highly regarded by employers and universities and there is a growing need for individuals who can master and manipulate new technologies. University courses that relate specifically to the skills acquired include Network Engineering, Web Technology, Games Design, Artificial Intelligence and Business Information Systems.
