## **Remote education provision: information for parents**

This information is intended to provide clarity and transparency to pupils and parents or carers about what to expect from remote education if local restrictions require entire cohorts (or bubbles) to remain at home.

For details of what to expect where individual pupils are self-isolating, please see the final section of this page.

### **The remote curriculum: what is taught to pupils at home**

A pupil's first day or two of being educated remotely might look different from our standard approach, while we take all necessary actions to prepare for a longer period of remote teaching.

### **What should my child expect from immediate remote education in the first day or two of pupils being sent home?**

All students in all year groups will continue to receive live learning via remote education on Microsoft Office 365 - Teams. Learning will be live through the chat, with tasks set and deadlines, as would be in class. Students will be expected to keep up with their work.

Students will attend their lessons remotely and follow their 5 lessons a day at the normal times they would have those lessons in school.

On the occasions where a teacher is not available to deliver live learning then lesson resources and structure will still be provided; Students can request support through Teams in those lessons but will need to wait for a reply.

### **Following the first few days of remote education, will my child be taught broadly the same curriculum as they would if they were in school?**

We teach broadly the same curriculum remotely as we do in school. Lessons will follow our schemes of work and mirror where possible what students would have been doing in the classroom. In practical subjects work set will reflect resources available to students at home.

## Remote teaching and study time each day

### How long can I expect work set by the school to take my child each day?

We expect that remote education (including remote teaching and independent work) will take pupils broadly the following number of hours each day:

Primary school-aged pupils	N/A
Secondary school-aged pupils.	The remote education provided is equivalent in length to the core teaching time students would receive in school and will include both recorded or live direct teaching time, and time for pupils to complete tasks and assignments independently. The amount of remote education provided is 5 hours a day. Students will also be asked to join assemblies and/or tutor activities which will be scheduled during the usual tutor time slot.

## Accessing remote education

### How will my child access any online remote education you are providing?

All lessons will be set using Microsoft Teams as the vehicle. This can be downloaded to 5 devices in each home. Students will have a separate Class Team for each subject they study. The instructions for their lessons will be in the chat section of their Class Team. Below is a list of other online tools and digital platforms that departments also use. Instructions for using these will be placed in the Class Team on Microsoft.

## **If my child does not have digital or online access at home, how will you support them to access remote education?**

We recognise that some pupils may not have suitable online access at home. We take the following approaches to support those pupils to access remote education:

If your child is having any challenges with accessing their online learning, then please contact Ms S Downward [downward.s@sjt.mmat.org.uk](mailto:downward.s@sjt.mmat.org.uk) to discuss any of the following below:

- Loaning a device (laptops or tablets).
- Loaning a dongle that will enable internet connectivity.
- Increasing your data allowance to allow 4G connectivity.

## **How will my child be taught remotely?**

We use a combination of the following approaches to teach pupils remotely:

- Live teaching (online lessons) through the chat function on Microsoft Teams or audio team meetings and calls.
- Recorded teaching (e.g. Oak National Academy lessons, video/audio recordings made by teachers)
- Textbooks and reading books students have at home.
- Commercially available websites supporting the teaching of specific subjects or areas, including video clips or sequences.
- Long-term project work and/or internet research activities.

## Engagement and feedback

**What are your expectations for my child's engagement and the support that we as parents and carers should provide at home?**

Our expectation is that all students attend lessons at their normal time every day and engage with all tasks set. Teachers will set out clear expectations for the standard of work that students should complete. Teachers will take a register for each lesson. Exceptional contributions/ work/ effort/ engagement will be given 'Reward' points.

We would actively encourage parents and carers to support online learning through the setting of routines and discussing with their child the importance of staying motivated. Parents should receive a phone call from their child's tutor at least once every two weeks.

**How will you check whether my child is engaging with their work and how will I be informed if there are concerns?**

Lesson attendance is monitored daily by the Progress Leader for each year group. Where there is a concern that a child has not been engaging, or engagement has dropped off suddenly then parents will be contacted by phone, email or letter.

**How will you assess my child's work and progress?**

Feedback can take many forms and may not always mean extensive written comments for individual children. For example, whole-class feedback or quizzes marked automatically via digital platforms are also valid and effective methods, amongst many others. Our approach to feeding back on pupil work is as follows:

Feedback will be provided to students via Microsoft Teams and a variety of educational websites. Students will receive feedback in line with our School Assessment Policy on our website.

## **Additional support for pupils with particular needs**

### **How will you work with me to help my child who needs additional support from adults at home to access remote education?**

We recognise that some pupils, for example some pupils with special educational needs and disabilities (SEND), may not be able to access remote education without support from adults at home. We acknowledge the difficulties this may place on families, and we will work with parents and carers to support those pupils in the following ways:

- Quality first teaching is the foundation on which our support for students with SEND is built upon. Teachers will differentiate their lessons and resources appropriately to ensure they are meeting the needs of all students in their classes.
- All students with an Educational and Health Care Plan will be offered a place in school and will continue to receive in-class support by members of the learning support team.
- The engagement of students with SEND in online learning will be monitored by the SEND Team and will have regular telephone calls made to parent (and students where appropriate) to support and help them overcome any specific barriers to learning.
- Members of the SEND team will be available to both students and parents via email and telephone throughout any school closure.
- Where students with SEND are unable to access remote learning, due to a lack of IT equipment, priority consideration will be given to the loan of a laptop/i Pad

## **Remote education for self-isolating pupils**

Where individual pupils need to self-isolate but the majority of their peer group remains in school, how remote education is provided will likely differ from the approach for whole groups. This is due to the challenges of teaching pupils both at home and in school.

### **If my child is not in school because they are self-isolating, how will their remote education differ from the approaches described above?**

Students will be able to access learning resources from the lessons in their Class Teams on Office 365 Teams. The teacher will know that the student is isolating and will include details to allow them to keep up with the learning so they can re-join their class after isolation.

Students can ask questions through the class chat, however, interaction will not be live – the teacher is still teaching the rest of the class. They will reply, but it may not be that day.
