

Year 11 Next Steps

Welcome to Year 11

Nine months of hard work but an extremely important year. A lot of effort now can give you more choice of what you can do in the future (both next year and over the next 50/60 years) and make your life that bit easier.

For example, if you do not get grades 4 – 9 in GCSE Maths and English you will have to continue with them (or their equivalents) until you pass them or turn 19.

Do not forget this is all about what YOU will be doing in the future. You are unique and will have different interests, talents and qualities from your friends and family. Find a course or career which suits your personality – not theirs. Do not let others stop you from working towards your dream. Help and support each other.

Career Ideas

There are thousands of different jobs out there, most of which you probably have not heard of before (Phlebotomist? Actuary?). Some of the more interesting and better paid jobs come with experience or promotion, so be aware what your first job could lead on to.

Research your career ideas, most information is online, but also in books in libraries or ask someone doing that job. They will happily tell you all the worst bits of the job as well. No job is perfect, there will always be something you will not like as much, you need to work out if you could cope with this or if it is a 'deal breaker'.

You need to know yourself well – your likes, dislikes, personality, attitude etc. All careers information usually includes a list of qualities needed for the job. See if this matches you. If it does not, you may need to think whether you would be suitable for it or enjoy it.

Be honest with yourself. Do not pretend you are something you are not, or you could find yourself in the wrong job or on the wrong course.

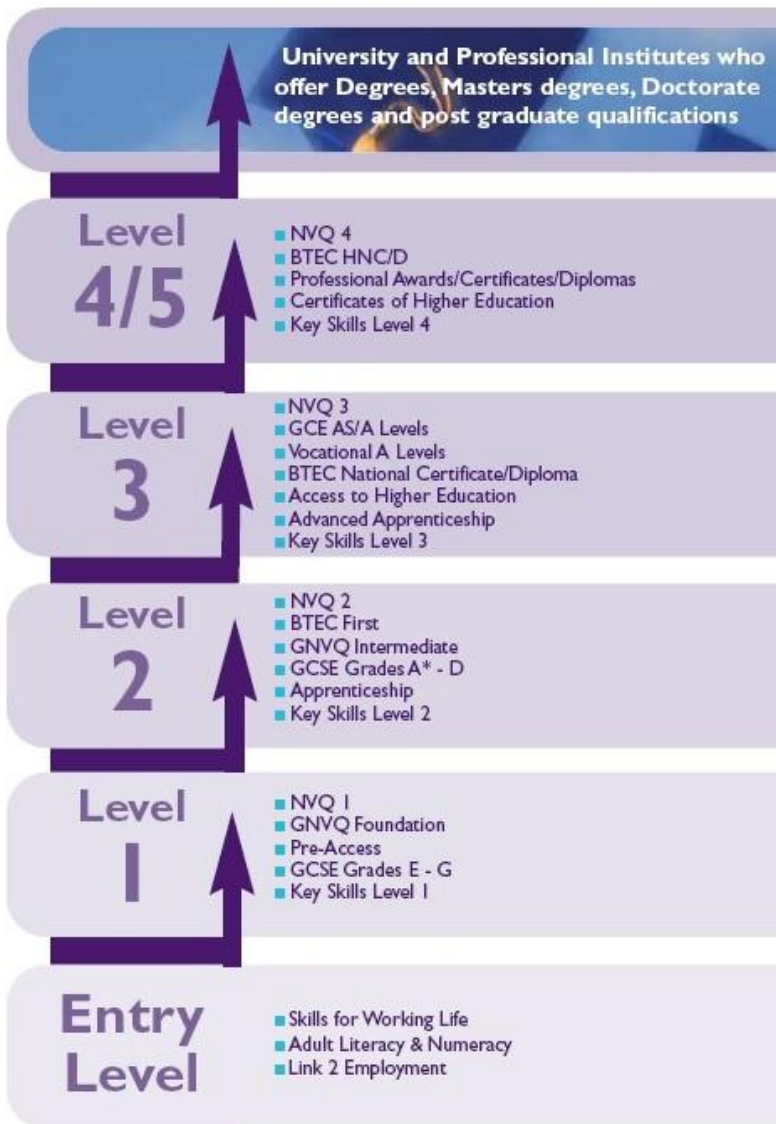

Options after Year 11

You will have to stay in education or training until you are 18. After Year 11 you have 3 main options:

- **Sir John Talbot's**
- **Colleges of Further Education** e.g., Shrewsbury Colleges Group, Newcastle & Stafford Colleges Group, South Cheshire College, Telford College and Reaseheath College
- **Apprenticeships** paid work with training

IMPORTANT: You can apply for several different options at the same time and then decide which one you prefer. For example, you can apply for a place at Grove College, Newcastle College and explore the apprenticeship route all at the same time. Final decisions can be made when you get your GCSE results in August. Confirm a place at one then withdraw from the others.

Understanding Levels

Usually the different levels lead onto each other – apart from some apprenticeships where you may start on Level 2 even if you have a Level 3 qualification, so you can cover all aspects of the work.

You must have Level 3 qualifications to go to university.

One Level 3 EXTENDED Diploma is equivalent to 3 A' levels.

Most Level 3 courses need GCSEs in Maths and/or English – you will need to check the entry requirements for the courses you wish to take.

A' levels are tough academic study, and you usually choose 3 subjects with exams at the end of the two years.

BTECs will have more coursework and be related to a career area – such as Health & Social Care, however, it is worth noting that BTECs do now involve an exam component.

Take the subjects you enjoy the most and will expect to get the best grades in. The higher the grades the more choice you have of university courses.

If you know what you want to do in the future make sure you take the right subjects – some career areas, such as architecture, medicine, law and the creative industries may want certain subjects. For other career areas it's the grades and skills you have acquired which are more important.

Useful Websites

Career sites

<https://www.unifrog.org/> One stop careers platform – use SJT email address to log in
www.icould.com – Shows career videos of people in a range of jobs, includes a career quiz to give you ideas of roles suited to your personality and general careers information.
www.nationalcareersservice.direct.gov.uk – Government website providing information on a range of careers.
www.prospects.ac.uk – Advice on universities, gap years, apprenticeships etc.

Further Education (College/Sixth Form)
