## Our vision

At Sir John Talbot's School, our ethos "achievement through caring" embodies the holistic approach we take to supporting students, so that they may achieve in all aspects of their development. We aim to enhance their life chances for the future by providing tailored support throughout their time in school.

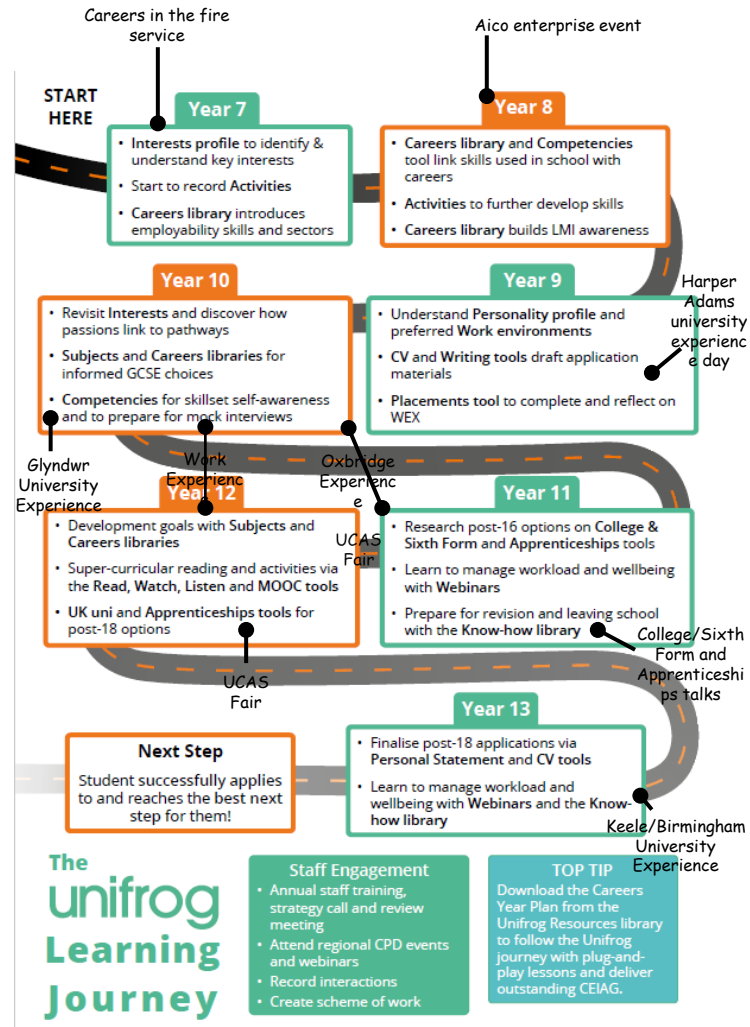

We endeavour to ensure that students and parents have access to independent advice and guidance (IAG), whenever required, to assist with making important academic or career decisions, as well as offering emotional or medical advice if needed.

Our aim is to ensure that all students are **#realworldready** by the time they leave Sir John Talbot's School.
